EDUCATION

Harvard University,
Graduate School of Design

M.Des, Technology
M.Arch I, Advanced Placement
December 2023, Cambridge MA

Washington University in St Louis

B.S. Computer Science
B.S. Architecture
3.97/4.00, summa cum laude
May 2020, St. Louis MO

SKILLS

Programming

SwiftUI
C#, Python
Javascript
React, d3
AWS
OAuth
GraphQL
Git

Design, UI, UX

Research
Brainstorm
Prototyping
Figma, Adobe
Mural, Jira

3D

Rhino, Grasshopper
Blender, Houdini
Render
3D printing
Robotic Arm

EXPERIENCE

iOS Software Engineer,   LOTUS APP   Cambridge MA
April 2023 - Present

Oversee UI UX design and enginnering for Lotus App, a reproductive health-focused social platform for women+.

Engineer the UX. Execute the front-end interface with SwiftUI. Develop AWS networking. Integrate MongoDB data connection to the backend.

Conducted usability tests on MVP features, utilizing feedback to drive iterative enhancements.

User Experience Intern,   AUTODESK   Boston MA
May 2023 - August 2023

Designed and proposed features for data selection with Autodesk's Dynamo product connecting to cloud. (Dynamo, a visual programming tool for design automation in AEC industry.)

Conducted user research to understand Dynamo use cases and addressed their pain-point with cloud-connected features.

Implemented and prototyped new features involving OAuth, GraphQL, and Autodesk Internal APIs.

Computational Designer,   UNSTUDIO   Amsterdam NL
September 2021 - September 2022

Won three architecture design competitions in Saudi Arabia and China. Collaborated with two to three designers by developing computational design scripts.

Orchestrated the end-to-end design of a Porsche retail space in Changsha, China, from strategic concept to construction. Presented in client meetings and led consultant meetings.

Led a team of four for the villa competition submission.

Research Assistant,   WASHU   St. Louis MO
June 2020 - June 2021

Initiated and prototyped the web user interface for Catoptric Surface, an efficient daylight research project joint by Computer Science and Architecture Departments at Washington University in St. Louis.

Optimized the data calculation with vector in grasshopper and monitored the computational component in the software-to-hardware workflow.

Computational Design Intern,   ROBOTICPLUS   Shanghai CN
June 2020 - August 2020

Operated robotic arms following paths generated from generative design scripts and simulated the process digitally before execution.

Teaching Assistant,   WASHU   St. Louis MO
August 2018 - May 2020

Selected as TA for CSE438 iOS Application Development, CSE204 Web Development, and CSE256 Introduction to Human-Centered Design.
